

# Document Status and Revision History

## Smart Metering Start-Up Guide

### Status

This guide is under development. We will update it when there are changes to the MDM/R or to procedures, and will record updates in the revision history section below.

### Revision History

#### April 8, 2010

- Minor editorial revisions
- Changed the email address listed for questions regarding the guide to contact us from [market.entry@ieso.ca](mailto:market.entry@ieso.ca) to [mdmr.registration@ieso.ca](mailto:mdmr.registration@ieso.ca)
- Changed the email address for question once an LDC is in production from [customer.relations@ieso.ca](mailto:customer.relations@ieso.ca) to [mdmr.support@ieso.ca](mailto:mdmr.support@ieso.ca)
- Added information regarding the new Business Process Development Workshop being offered by the IESO. (Section 2.2)
- In the Stage 2, Planning and Development section changed:
  - Descriptions and offerings regarding the LDC Introductory Workshop
  - Wave Assignment description
- In the Stage 3, Registration, System Development and Internal Testing changed:
  - Unit Testing process
  - Added connectivity timelines
- Clarified the GUI capabilities for authorized users (Section 3.2, bullet C)
- Clarified SIT is 10 business days (Stage 4 section)

### **September 8, 2009**

- Noted the addition of Phase 4 to the project (See Section 2.1)
- Indicated the need to limit the meter read data being sent to the MDM/R to only those meters synchronized with the MDM/R (See Section 3.2(F))
- In response to your requests, added a sample list of business processes that might have to be integrated with the MDM/R (See Section 3.2(K))
- Noted the addition of our Project Plan Template and Activity Descriptions material to the SMSIP website (See Section 4 – Stage 2 Activities: Your project plan – and enrollment waves)
- Clarified the main driver in assigning an LDC to an enrollment wave (See Section 4 – Stage 2 Activities: Your project plan – and enrollment waves)
- Changed our classification of Unit Testing from an ‘optional’ to a ‘strongly recommended’ activity (See Section 4 – Stage 3 Activities: Testing your CIS interfaces)
- Noted the OEB’s institution of required quarterly smart metering information reporting by all LDCs (See Section 4 – Stage 3 Activities: Update us on the status of your activities)
- Minor editorial revisions

### **April 16, 2009**

- Minor editorial changes
- Update to section on MDM/R governance to reflect that the SME-LDC Agreement and other aspects of MDM/R governance have not yet been formalized

### **January 6, 2009**

- Change to *Forms* section on page 25: we need as much information as possible on the *LDC Information and Progress Report* form.

### **December 22, 2008**

- Editorial and formatting changes

### **December 19, 2008**

- First issue
