## **Smart Metering and the MDM/R: Guide to Testing and Cutover**

### **Status**

This guide is under development. We will update it when there are changes to the MDM/R or to procedures, and will record updates in the revision history section below.

### **Revision History**

#### **April 9, 2010**

Change to instructions on section: How do you prepare for connectivity testing? By adding details in regards to the File Name, Content and Size. Change example to align with Technical Specifications Requirements.

Added instructions to section: What is the timeframe for connectivity testing?: LDCs need to provide the IESO with forms and digital certificates at least 4 weeks prior to the expected connectivity test date.

Change throughout section Unit Testing to better reflect nature of the test and LDC involvement.

Changes to sections System Integration Testing (SIT) and Qualification Testing (QT) to reflect that LDCs should check Website for GUI training calendar and registration information, added LDC responsibility of attending daily SIT and QT meetings and IESO responsibility of scheduling and attending SIT and QT meetings.

Added MDM/R Registration and Enrolment contact information: [mdmr.registration@ieso.ca](mailto:mdmr.registration@ieso.ca) and fax number.

Formatting changes across the document.
